Ramón Sánchez Baquedano

Chile ra.sanchez.baq@gmail.com ramonsanchezbaquedano

Summary

AI Engineer specialized in Large Language Models, multi-agent system architecture, and vision models (segmentation, OCR). Experienced in building agentic frameworks for report automation and academic applications, with additional interest in economic complexity.

Experience

Pontificia Universidad Católica de Chile, Research Associate — Santiago, Chile
- **Python | LLMs | Vision Models | Social Media Data** — Aug 2026 – present
- Conducting research using large language models to identify child behavior associated with ultra-processed food on social media. — 2 months
- Processed over 30,000 social media videos and more than 100,000 frames through multi-agent pipelines.
- Developed self-consistency and confidence-weighted voting workflows to improve labeling reliability.

Streamdata, AI Engineer — Concepción, Chile
- **Python | Django | LLMs | Docker | Coolify** — Apr 2026 – present
- Developed automation of predefined reports. — 6 months
- Developed hierarchical memory for agents.
- Built a feature for data exploration and analysis to support onboarding processes.

Universidad de Concepción, Research Fellow in Artificial Intelligence — Concepción, Chile
- **Python | LLMs** — Apr 2025 – Dec 2025
- Developing and researching a project to make the academic journey easier for students, using large language models and building different frameworks with data from the university. — 9 months

Streamdata, GenAI Intern — Concepción, Chile
- **Python | Django | LLMs** — Dec 2025 – Feb 2026
- Improved AI agent reliability and task performance by closing the semantic gap and building self-learning loops from tool and data ecosystems. — 3 months

AI World / CEPS (Centre for European Policy Studies), Data Scientist Intern — Brussels, Belgium
- **Python | Pandas | LLMs | OCR | Web Scraping** — Sept 2025 – Jan 2026
- Mapped startups and scientific research in artificial intelligence, sourced from conferences such as NeurIPS and from multiple venture capital firms. — 5 months
- Consolidated data using LLMs, OCR, and scraping tools for data collection within the Data Science Unit at CEPS.

Universidad de Concepción, Teaching Assistant — Multivariate Statistical Analysis — Concepción, Chile
- **Python | Scikit-learn** — Mar 2025 – July 2025
- Conducted practical sessions covering data manipulation exercises and regression models in Python. — 5 months

Universidad de Concepción, Teaching Assistant — Multivariate Statistical Analysis — Concepción, Chile
- **Python | Scikit-learn** — Mar 2024 – July 2024
- Conducted practical sessions including applied analysis such as linear regression, factor analysis, and discriminant analysis. — 5 months

Technovation Girls Chile, Project Tutor — Concepción, Chile
- Guided and supported girls between 5 and 10 years old in developing projects focused on creating value through technological tools in education. — Jan 2023 – Jan 2023 — 1 month

Education

BSc **Universidad de Concepción**, Industrial Engineering — Concepción, Chile
- **Thesis:** Use of Large Language Models to Create and Stress Public Policy: An Economic Complexity Approach. — Mar 2021 – July 2026
- Awarded the maximum grade (7.0/7.0) for the thesis.
